

Murray Supply Company is the **ONE SOURCE** for all of your power and process piping needs.

### PIPE AND TUBE

ERW and seamless steel pipe, chrome moly, fusion bonded epoxy, stainless steel-all grades, alloy pipe, carbon steel tube, stainless steel tube, stainless sanitary tube, copper tube, PVC pipe – all schedules, CPVC pipe, Kynar pipe, HDPE SDR and ULFM, Ductile iron, cast iron, fiberglass, CSST Tubing, ceramic lined pipe, CHDPE corrugated pipe, Underground Coatings: Blasted, primed and painted.

### BUTTERFLY VALVES

General service duty valves in ductile iron and cast iron. High performance butterfly valves available in carbon steel and stainless steel. A variety of trim materials allow us to custom design the valve for your application. Available as manual or actuated.

### FIRE PROTECTION

In addition to HDPE or Ductile pipe supplied for the underground loop we can provide post indicators, UL/FM underground valves – flanged and mechanical joint, UL/FM butterfly valves, UL listed bronze valves and fire hydrants.

### PIPE FITTINGS

Malleable iron, cast iron – threaded and flanged, carbon/stainless steel weld fittings – all grades, carbon/stainless forged fittings, chrome-moly fittings – all grades, Victaulic grooved and press fittings, copper fittings, copper press fittings, stainless sanitary fittings, PVC/CPVC fittings in all schedules, Kynar fittings, o-lets in all materials and grades, High Yield fittings, Swagelok fittings, specialty and custom fittings.

### STRAINERS

Available in all materials; cast iron, forged steel, carbon steel, or fiberglass. General service strainers available from stock and custom fabricated strainers made to your specifications. Interior coating services available.

### EMERGENCY EQUIPMENT

We can provide a variety of emergency equipment types. From a simple wall mounted eye wash station all the way to skid mounted tempering systems with enclosed showers. These skid packages can be custom designed to your specifications.

### GENERAL VALVES

Gate, Globe, Check and Ball Valves. We represent most of the top brands in the industry and can source the requirements for your project. Gate, Globes and Check valves in any size range, carbon steel, stainless steel, forged steel, and bronze. Ball valves are available in brass/bronze, carbon steel, stainless steel and other alloys. Whether it's 1, 2 or 3 piece design or all the way to large bore trunnion mounted high pressure. All ball valves are available in manual service or actuated.

### EXPANSION JOINTS

Available in rubber, PTFE, and metal. All size ranges from the smallest up to 120" fabricated joints. Also available in this category are vibration dampeners, penetration seals, flexible hose connectors, expansion checks and duct expansion joints.

### INSTRUMENTATION

Instrumentation tubing and fittings available in a variety of materials and grades. Some other products in this category are; gauges, thermometers, flow meters, sight flow indicators, and injection quills.

# WHAT CAN WE DO FOR YOU?

- One Source Procurement Reduces Your Administrative Fees
- We Understand Contract Administration
- Over 15 Years Experience Handling Contracts for Power and Process Projects
- Ability to Provide Supply Bonds and Warranty Bonds
- Proven Track Record of Completing Successful Projects
- International Shipping Capabilities
- Tagging Service Clearly Identifies all Equipment
- Value Added Services
- Extensive Experience with Production Schedules
- Emergency Services Available
- We Provide Comprehensive Submittal Package for Technical Review
- GSA Schedule Holder
